The Art and Science of Lightning Protection By Martin A. Uman

A lightning strike to an unprotected object or system can be disastrous - in the United States lightning is responsible for over 30% of all electric power failures, causes billions of dollars' worth of property damage, and an average of 85 fatalities a year. This accessible text describes all aspects of lightning protection and includes many illustrative drawings and photographs. The author examines the physical behavior of lightning, various types of lightning damage, the role of lightning detection and warning in effective protection, as well as options for deflecting or eliminating lightning. U.S. and international lightning protection standards are discussed. This book will be essential reading for everyone involved in the business of lightning protection, including meteorologists, atmospheric scientists, architects, engineers, and fire-safety experts. Insurance practitioners and physicians will find this reference of significant value.

Editorial Review

Review

"There are no other books, in my opinion, that complete with this publication. Uman is the most competent individual to write this book, which fills the gap between the advanced text that he coauthored with Rakov and his introductory popular book, All About Lightning ... I recommend this book without any hesitation."

Bulletin of the American Meteorological Society

About the Author

Martin A. Uman is Distinguished Professor in the Department of Electrical and Computer Engineering at the University of Florida.
