## End-of-Life Issues, Grief, and Bereavement: What Clinicians Need to Know

By Sara Honn Qualls, Julia E. Kasl-Godley

**A practical overview of clinical issues related to end-of-life care, including grief and bereavement**

The needs of individuals with life-limiting or terminal illness and those caring for them are well documented. In this informative guide, editors Sara Qualls and Julia Kasl-Godley have brought together a notable team of international contributors to produce a clear structure offering mental health professionals a framework for developing the competencies needed to work with end-of-life care issues, challenges, concerns, and opportunities.

Part of the *Wiley Series in Clinical Geropsychology*, this thorough and up-to-date guide answers complex questions often asked by patients, their families and caregivers, and helping professionals as well, including:

- How does dying occur, and how does it vary across illnesses?
- What are the spiritual issues that are visible in end-of-life care?
- How are families engaged in end-of-life care, and what services and support can mental health clinicians provide them?
- How should providers address mental disorders that appear at the end of life?
- What are the tools and strategies involved in advanced care planning, and how do they play out during end-of-life care?
