**Knight's Forensic Pathology Fourth Edition** By Pekka Saukko, Bernard Knight

The fourth edition of **Knight's Forensic Pathology** continues to be the definitive international resource for those in training and in practice, covering all aspects of the medico-legal autopsy, including the cause and time of death, interpretation of wounds and every other facet of the investigation of a fatality.

The contents are intended to lead the pathologist – and in some countries, the non-pathologist – through the procedures needed in the examination of a body found under obscure, suspicious or even criminal circumstances.

Although police procedures and the habits of pathologists may vary from country to country, the philosophy and techniques presented in this book offer a guide to good practices that can be modified according to local circumstances.

In this new edition the text has been thoroughly updated and is complemented by the addition of over 200 new colour illustrations. It maintains the praised tradition of clarity and readability established since Prof. Bernard Knight's first edition was published in 1991, with an emphasis on the practical application of knowledge and research findings and the avoidance of over-interpretation.

## **Editorial Review**

### **Review**

"This remains one of the most important books in this field of pathology. It is comprehensive and well written and this edition has been significantly changed and updated. The images and drawings are carefully chosen and nicely depict common and uncommon problems encountered in forensic pathology. All the black-and-white drawings have been redrawn in full color. This book is highly recommended for everyone who performs medicolegal autopsies and should be in all pathology and general hospital libraries." -

**Anamarija M. Perry, MD(University of Manitoba College of Medicine), Doody Enterprises**

"...this is a valuable, well written and well-illustrated text that deserves to grace the shelves of forensic pathologists, and which will not be out of place on the shelf of any pathologist engaged in autopsy practice." *? Association of Clinical Pathologists News*
