Editorial Review

Review

"The strength of this ambitious publication is its linking of technical development to the social and cultural context."-Building Design "A labour of love... Chronicles everything from geometric pattern in medieval cathedrals to the most daring uses of reinforced concrete."-Wallpaper* "More than 800 photographs, plans and drawings bring to life some of architecture's greatest achievements."-Financial Times "This is a truly heavyweight publication which every student of engineering and architecture should have highlighted on their first-year reading list."-Alex Wright, architect, Architects' Journal

About the Author

William Addis is a consulting engineer at Buro Happold in London and the author of numerous books, academic papers, and book reviews on construction history published over the past 25 years. He holds a doctorate degree in the history and philosophy of engineering from the University of Reading, where he taught this subject for 15 years; he has also delivered lecture courses on engineering history at Cambridge University, the University of Bath, and University College, London. In 1998, he helped curate the exhibition "The Art of the Engineer" at the Pompidou Centre in Paris and contributed to the book that accompanied the exhibition. Addis is an active member of the Institution of Structural Engineers' History Study Group and lectures at professional conferences around the world.

Users Review

From reader reviews:

Randell Easley:

Have you spare time for a day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a stroll, shopping, or went to the particular Mall. How about open or maybe read a book allowed Building: 3,000 Years of Design, Engineering, and Construction? Maybe it is to get best activity for you. You already know beside you can spend your time with the favorite's book, you can more intelligent than before. Do you agree with their opinion or you have additional opinion?

Gloria Eller:

As people who live in typically the modest era should be up-date about what going on or facts even knowledge to make these people keep up with the era which is always change and progress. Some of you maybe may update themselves by studying books. It is a good choice for you but the problems coming to you actually is you don't know what kind you should start with. This Building: 3,000 Years of Design, Engineering, and Construction is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and wish in this era.

Fran Short:

That book can make you to feel relax. This kind of book Building: 3,000 Years of Design, Engineering, and Construction was multi-colored and of course has pictures on there. As we know that book Building: 3,000 Years of Design, Engineering, and Construction has many kinds or variety. Start from kids until young adults. For example Naruto or Detective Conan you can read and feel that you are the character on there. So , not at all of book usually are make you bored, any it offers you feel happy, fun and rest. Try to choose the best book to suit your needs and try to like reading that will.

Christopher Arnold:

Reading a guide make you to get more knowledge from this. You can take knowledge and information from the book. Book is prepared or printed or highlighted from each source this filled update of news. Within this modern era like today, many ways to get information are available for you actually. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just seeking the Building: 3,000 Years of Design, Engineering, and Construction when you essential it?
