A High School First Course in Euclidean Plane Geometry By Charles H. Aboughantous

A High School First Course in Euclidean Plane Geometry is intended to be a first course in plane geometry at the high school level. Individuals who do not have a formal background in geometry can also benefit from studying the subject using this book. The content of the book is based on Euclid's five postulates of plane geometry and the most common theorems. It promotes the art and the skills of developing logical proofs. Most of the theorems are provided with detailed proofs. A large number of sample problems are presented throughout the book with detailed solutions. Practice problems are included at the end of each chapter and are presented in three groups: geometric construction problems, computational problems, and theorematical problems. The answers to the computational problems are included at the end of the book. Many of those problems are simplified classic engineering problems that can be solved by average students. The detailed solutions to all the problems in the book are contained in the Solutions Manual. A High School First Course in Euclidean Plane Geometry is the distillation of the author's experience in teaching geometry over many years in U.S. high schools and overseas. The book is best described in the introduction. The prologue offers a study guide to get the most benefits from the book.

Editorial Review

Users Review

From reader reviews:

Madeline Wayt:

Reading can called head hangout, why? Because when you find yourself reading a book specially book entitled A High School First Course in Euclidean Plane Geometry the mind will drift away trough every dimension, wandering in every aspect that maybe not known for but surely might be your mind friends. Imaging every word written in a publication then become one application form conclusion and explanation in which maybe you never get prior to. The A High School First Course in Euclidean Plane Geometry giving you an additional experience more than blown away the mind but also giving you useful data for your better life with this era. So now let us present to you the relaxing pattern this is your body and mind are going to be pleased when you are finished looking at it, like winning a casino game. Do you want to try this extraordinary shelling out spare time activity?

Loyd Tyler:

Many people spending their time period by playing outside along with friends, fun activity with family or just watching TV the whole day. You can have new activity to pay your whole day by looking at a book. Ugh, do you think reading a book really can hard because you have to bring the book everywhere? It all right you can have the e-book, having everywhere you want in your Cell phone. Like A High School First Course in Euclidean Plane Geometry which is obtaining the e-book version. So , why not try out this book? Let's observe.

David Perrin:

As a college student exactly feel bored to be able to reading. If their teacher asked them to go to the library or even make summary for some e-book, they are complained. Just very little students that has reading's spirit or real their pastime. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading really. Any students feel that reading is not important, boring along with can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this A High School First Course in Euclidean Plane Geometry can make you experience more interested to read.

Ruth Zimmer:

E-book is one of source of expertise. We can add our information from it. Not only for students but also

native or citizen need book to know the upgrade information of year to be able to year. As we know those ebooks have many advantages. Beside all of us add our knowledge, also can bring us to around the world. With the book A High School First Course in Euclidean Plane Geometry we can acquire more advantage. Don't that you be creative people? Being creative person must love to read a book. Just simply choose the best book that ideal with your aim. Don't become doubt to change your life at this book A High School First Course in Euclidean Plane Geometry. You can more pleasing than now.
