Microstrip Filters for RF / Microwave Applications By Jia-Sheng Hong

The first edition of “Microstrip Filters for RF/Microwave Applications” was published in 2001. Over the years the book has been well received and is used extensively in both academia and industry by microwave researchers and engineers. From its inception as a manuscript the book is almost 8 years old. While the fundamentals of filter circuits have not changed, further innovations in filter realizations and other applications have occurred with changes in the technology and use of new fabrication processes, such as the recent advances in RF MEMS and ferroelectric films for tunable filters; the use of liquid crystal polymer (LCP) substrates for multilayer circuits, as well as the new filters for dual-band, multi-band and ultra wideband (UWB) applications.

Although the microstrip filter remains as the main transmission line medium for these new developments, there has been a new trend of using combined planar transmission line structures such as co-planar waveguide (CPW) and slotted ground structures for novel physical implementations beyond the single layer in order to achieve filter miniaturization and better performance.

Also, over the years, practitioners have suggested topics that should be added for completeness, or deleted in some cases, as they were not very useful in practice.

In view of the above, the authors are proposing a revised version of the “Microstrip Filters for RF/Microwave Applications” text and a slightly changed book title of “Planar Filters for RF/Microwave Applications” to reflect the aforementioned trends in the revised book.

Editorial Review

Users Review

From reader reviews:

Kara Corbett:

Have you spare time for the day? What do you do when you have a lot more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a go walking, shopping, or went to the actual Mall. How about open or even read a book called Microstrip Filters for RF / Microwave Applications? Maybe it is to be best activity for you. You understand beside you can spend your time with the favorite's book, you can better than before. Do you agree with the opinion or you have different opinion?

Sarah Tomczak:

The guide with title Microstrip Filters for RF / Microwave Applications contains a lot of information that you can discover it. You can get a lot of advantage after read this book. This particular book exist new information the information that exist in this reserve represented the condition of the world right now. That is important to yo7u to learn how the improvement of the world. This kind of book will bring you throughout new era of the syndication. You can read the e-book on the smart phone, so you can read this anywhere you want.

Linda Livingston:

This Microstrip Filters for RF / Microwave Applications is great book for you because the content which can be full of information for you who else always deal with world and have to make decision every minute. That book reveal it info accurately using great organize word or we can declare no rambling sentences included. So if you are read this hurriedly you can have whole information in it. Doesn't mean it only offers you straight forward sentences but difficult core information with beautiful delivering sentences. Having Microstrip Filters for RF / Microwave Applications in your hand like obtaining the world in your arm, data in it is not ridiculous 1. We can say that no book that offer you world throughout ten or fifteen minute right but this reserve already do that. So , this really is good reading book. Hello Mr. and Mrs. active do you still doubt that?

John Stewart:

You can get this Microstrip Filters for RF / Microwave Applications by go to the bookstore or Mall. Just simply viewing or reviewing it can to be your solve trouble if you get difficulties on your knowledge. Kinds of this e-book are various. Not only by simply written or printed but additionally can you enjoy this book by

e-book. In the modern era such as now, you just looking of your mobile phone and searching what your problem. Right now, choose your current ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still update. Let's try to choose correct ways for you.
