Information Security Management Principles - Second edition

By David Alexander, Amanda Finch, David Sutton

Information Security Management Principles - Second edition By David Alexander, Amanda Finch, David Sutton

Commercial, personal and sensitive information is very hard to keep secure, and technological solutions are not the only answer. In today's technology-driven environment, there is an ever-increasing demand for information delivery on various devices in the office, at home and in public places. A compromise has to be struck between security of information and its availability. This book provides significant first steps along the path of dealing with information assurance in a realistic and comprehensive manner. The second edition has been expanded to include the security of cloud-based resources. The remainder of the contents have been reviewed and reordered to reflect the changes to the BCS Certification in Information Security Management Principles which the book supports. "The security of personal information has never been of greater concern to the public. The BCS provides valuable leadership in this area and this is a timely contribution to a vital process" (Richard Thomas, Information Commissioner). (Review of previous edition)

Editorial Review

Review
Although the book is targeted at students taking the CISMP examination, I would still recommend this book for any IT professional wishing to understand more about information security. The language used in the book is very accessible, so I would also recommend it to any senior manager wishing to understand the basics. If you want an excellent introduction to information security you could do worse than buying a copy of this book. Highly recommended.--John Hughes "InfoSec Skills "

The security of personal information must keep pace with technology in order to provide a safe and secure environment. This 2nd edition provides a timely update to ensure that BCS remains as an important leader in the education of information security principles.--David Smith "Information Commissioner's Office "

About the Author
The authors are at the forefront of information security and are instrumental in shaping policy and implementing best-practice. They have gained considerable experience across a wide range of public and private sector bodies including the Home Office, GCHQ, MoD, RAF, Royal Navy, British Airways, Marks & Spencer and O2.

Users Review

From reader reviews:
