Nonlinear Oscillations, Dynamical Systems, and Bifurcations of Vector Fields (Applied Mathematical Sciences) By John Guckenheimer, Philip Holmes

An application of the techniques of dynamical systems and bifurcation theories to the study of nonlinear oscillations. Taking their cue from Poincare, the authors stress the geometrical and topological properties of solutions of differential equations and iterated maps. Numerous exercises, some of which require nontrivial algebraic manipulations and computer work, convey the important analytical underpinnings of problems in dynamical systems and help readers develop an intuitive feel for the properties involved.

Review

J. Guckenheimer and P. Holmes

Nonlinear Oscillations, Dynamical Systems, and Bifurcations of Vector Fields

*"The book is rewarding reading . . . The elementary chapters are suitable for an introductory graduate course for mathematicians and physicists . . . Its excellent survey of the mathematical literature makes it a valuable reference."*JOURNAL OF STATISTICAL PHYSICS

Users Review

From reader reviews:

Arnold Williams:

Within other case, little individuals like to read book Nonlinear Oscillations, Dynamical Systems, and Bifurcations of Vector Fields (Applied Mathematical Sciences). You can choose the best book if you want reading a book. Providing we know about how is important the book Nonlinear Oscillations, Dynamical Systems, and Bifurcations of Vector Fields (Applied Mathematical Sciences). You can add information and of course you can around the world with a book. Absolutely right, simply because from book you can realize everything! From your country right up until foreign or abroad you will be known. About simple point until wonderful thing you could know that. In this era, we could open a book or maybe searching by internet device. It is called e-book. You should use it when you feel uninterested to go to the library. Let's study.

Margaret Calderon:

Is it you actually who having spare time subsequently spend it whole day by watching television programs or just lying down on the bed? Do you need something new? This Nonlinear Oscillations, Dynamical Systems, and Bifurcations of Vector Fields (Applied Mathematical Sciences) can be the answer, oh how comes? A fresh book you know. You are and so out of date, spending your free time by reading in this new era is common not a geek activity. So what these guides have than the others?

Scott Croft:

In this particular era which is the greater person or who has ability in doing something more are more precious than other. Do you want to become certainly one of it? It is just simple method to have that. What you need to do is just spending your time not much but quite enough to possess a look at some books. Among the books in the top record in your reading list is Nonlinear Oscillations, Dynamical Systems, and Bifurcations of Vector Fields (Applied Mathematical Sciences). This book that is certainly qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking right up and review this

guide you can get many advantages.

Bryce Adams:

What is your hobby? Have you heard which question when you got scholars? We believe that that concern was given by teacher on their students. Many kinds of hobby, Every person has different hobby. And you know that little person just like reading or as reading through become their hobby. You must know that reading is very important in addition to book as to be the point. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You discover good news or update concerning something by book. Amount types of books that can you choose to use be your object. One of them is actually Nonlinear Oscillations, Dynamical Systems, and Bifurcations of Vector Fields (Applied Mathematical Sciences).
