Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition) From Woodhead Publishing

Microbiological risk assessment (MRA) is one of the most important recent developments in food safety management. Adopted by Codex Alimentarius and many other international bodies, it provides a structured way of identifying and assessing microbiological risks in food. Edited by two leading authorities, and with contributions by international experts in the field, Microbiological risk assessment provides a detailed coverage of the key steps in MRA and how it can be used to improve food safety.

The book begins by placing MRA within the broader context of the evolution of international food safety standards.

Part one introduces the key steps in MRA methodology. A series of chapters discusses each step, starting with hazard identification and characterisation before going on to consider exposure assessment and risk characterisation. Given its importance, risk communication is also covered. Part two then considers how MRA can be implemented in practice. There are chapters on implementing the results of a microbiological risk assessment and on the qualitative and quantitative tools available in carrying out a MRA. It also discusses the relationship of MRA to the use of microbiological criteria and another key tool in food safety management, Hazard Analysis and Critical Control Point (HACCP) systems.

With its authoritative coverage of both principles and key issues in implementation, Microbiological risk assessment in food processing is a standard work on one of the most important aspects of food safety management.

- Provides a detailed coverage of the key steps in microbiological risk assessment (MRA) and how it can be used to improve food safety
- Places MRA within the broader context of the evolution of international food safety standards
- Introduces the key steps in MRA methodology, considers exposure assessment and risk characterisation, and covers risk communication

Editorial Review

Review

...highly recommended to all scientists and practitioners in food industry, academia and authorities as an indispensable guide in this special field., *Advances in Food Research*

...written by the 'who's who' of risk assessment., *Food Technology*

Whether you're a researcher, food technology student or a safety decision maker, this book offers valuable resources for everyone., *Food Technology*

About the Author

Martyn Brown was formerly a Senior Microbiologist at Unilever Savoury Global Supply Chain and Technology Group, UK. Now a consultant, he is an internationally-known authority on the management of food safety.

Dr Mike Stringer is Director of the Food Technology Division at the internationally-renowned Campden and Chorleywood Food Research Association.

Users Review

From reader reviews:

Jacqueline Kang:

Book is definitely written, printed, or highlighted for everything. You can understand everything you want by a guide. Book has a different type. As it is known to us that book is important factor to bring us around the world. Adjacent to that you can your reading skill was fluently. A e-book *Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition)* will make you to always be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think that will open or reading a book make you bored. It's not make you fun. Why they can be thought like that? Have you trying to find best book or appropriate book with you?

Ellen Farnsworth:

The ability that you get from *Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition)* will be the more deep you looking the information that hide in the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to understand but *Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition)* giving you thrill feeling of reading. The copy writer conveys their point in particular way that can be understood by anyone who read this because the author of this reserve is well-known enough. This specific book also makes your current vocabulary increase well. Making it easy to understand then can go along, both in printed or e-book style are available. We suggest you for having this particular *Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition)* instantly.

Clarence Lowery:

Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition) can be one of your basic books that are good idea. Many of us recommend that straight away because this publication has good vocabulary that could increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The author giving his/her effort to put every word into joy arrangement in writing Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition) however doesn't forget the main stage, giving the reader the hottest in addition to based confirm resource facts that maybe you can be one among it. This great information could drawn you into completely new stage of crucial pondering.

Carmen Vasquez:

Do you like reading a e-book? Confuse to looking for your best book? Or your book has been rare? Why so many question for the book? But almost any people feel that they enjoy regarding reading. Some people likes reading through, not only science book but additionally novel and Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition) or maybe others sources were given understanding for you. After you know how the great a book, you feel need to read more and more. Science guide was created for teacher or maybe students especially. Those books are helping them to put their knowledge. In different case, beside science publication, any other book likes Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition) to make your spare time more colorful. Many types of book like this one.
