## Seeds & Agricultural Production By A. Fenwick Kelly

A guide to the worldwide structure of the seed production and distribution industry, emphasizing its key role in improving agricultural production, particularly food supply, and considering how growers can be educated in the use of new varieties to improve their production. The importance of seed for food and industrial crop production is considered both in temperate and tropical agriculture, and methods ensuring continuity of supply and quality control are discussed. The work also analyzes the roles of public administrations and private enterprises, and considers seed legislation and breeders' rights. The economic factors influencing seed production are studied and the author goes on to discuss the role of the seed grower and how seeds are, and should be, distributed. The work concludes with an analysis of seed trade organization in Europe, North America and the Third World, and gives practical advice on how efficient seed supply systems can be established and maintained.
